- **Syllabus :**

Subject : Paper CC104 : Statistical And Mathematical Foundation

Courses Name : Statistics Foundations 2 : Probability

- Importance and applications of statistics
- Role of statistics in decision-making, predictions, and discoveries
- Use of statistics in various fields (politics, healthcare, investments, etc.)
- Introduction to probability
- Understanding probability and its significance
- Probability for analyzing past and future outcomes
- Basic probability concepts and terminology
- Formulas and techniques in probability
- Permutations and combinations
- Calculation and applications
- Percentiles
- Understanding and calculation of percentiles
- Multiple event probabilities
- Addition and subtraction rules of probability
- Probability trees
- Representation and analysis of outcomes
- Bayes' Theorem
- Concept and applications
- Binomial probability
- Understanding and calculations
- Data interpretation using probability
- Using statistics to prove theories and make decisions
- Application of probability in resource optimization and real-world problem solving
